Summary

Aspiring **AI/ML Engineer & Full-Stack Developer** with hands-on research experience at **DRDO (DIAT)** and multiple AI-driven projects. Skilled in **Python, FastAPI, React, TensorFlow, and system-level security**. Passionate about building intelligent, scalable, and secure applications that solve real-world problems.

Education

- Savitribai Phule Pune University** Pune, India
B.E. in Artificial Intelligence and Machine Learning; CGPA: 7.30 Nov 2022 – Jun 2025
- SVPM's College of Engineering** Pune, India
Diploma in Information Technology; 75.19% Jul 2019 – Oct 2022

Experience

- DIAT-DRDO** Pune, India
Research Intern — Cybersecurity & AI Systems Feb 2024 – Jul 2024
 - Developed a custom **secure bootloader in Assembly** integrated with TPM hardware to enable hardware-based trust and reduce OS-level vulnerabilities.
 - Worked on low-level programming, TPM hashing, and AI-driven defense applications ensuring secure system initialization.
- Kasnet Technologies** Pune, India
Software Intern Aug 2021 – Sep 2021
 - Built a **Python + JavaScript attendance system** for data automation and visualization, integrated with database-driven reporting.
 - Collaborated in an Agile team to test, debug, and document workflows.

Projects

- StoryWeaverAI — AI Story Generator** Developed a full-stack “Choose-Your-Own-Adventure” storytelling platform using **FastAPI, React, Gemini API, and PostgreSQL**. Implemented asynchronous job queues for smooth response generation and persistent user sessions. [GitHub](#) [Live Demo](#)
- AI MeetingBot — Real-Time Transcription Assistant** Created a transcription & summarization assistant using **Google Chirp STT**, WebSockets, and FastAPI. Converts live meeting audio into structured notes and summaries with minimal latency. [GitHub](#)
- Zero-Connect — Secure Real-Time Chat App** Built a secure messaging platform using **React.js + Node.js + WebSockets** with end-to-end encryption and live chat features. Deployed with Docker on Vercel; supports private channels and real-time notifications. [GitHub](#) [Live Demo](#)
- Crime Detection System — AI & Computer Vision** Developed a **YOLOv5-based weapon detection system** for CCTV surveillance using OpenCV and FastAPI. Triggered real-time alerts and stored visual logs for incident reporting. [GitHub](#)

Technical Skills

- Languages:** Python, JavaScript, SQL, Bash, Data Structures & Algorithms (DSA)
- Frameworks:** FastAPI, React, Next.js, Tailwind, Node.js
- AI/ML:** TensorFlow, scikit-learn, OpenCV, YOLOv5, Pandas, NumPy
- Databases:** PostgreSQL, MongoDB
- DevOps & Tools:** Docker, Git, Linux (Arch), AWS, Vercel, Netlify

Certifications

- Naukri Young Turks — Certificate of Merit** [View](#)
- Python Bootcamp: Zero to Expert — Udemy (2025)** [View](#)
- Full Stack Web Development — Udemy (2024)** [View](#)
- SSOC Season 2 — Script Foundation (2023)** [View](#)
